

WORD BASED LOTTERY GAME

Background

[0001] Lotteries and lottery theory are well known in the art. Generally a prize is awarded when an assigned or chosen series of numbers is matched with corresponding numbers that have been randomly chosen.

[0002] U.S. Patent No. 6,168,521 entitled "Video Lottery Game" discloses a video lottery system utilizing multiple player-activated video terminals that are linked to computers performing centralized game draw and accounting functions. Each player places a wager and selects his lottery draw choices. The system enrolls the player in a future lottery game after the player makes his choices. The system automatically draws the lottery numbers. The results of the selected game are displayed at the player's terminal in a manner as to provide the excitement of a real-time game.

[0003] U.S. Patent No. 6,080,062 entitled "Lotto Gaming Apparatus and Method" discloses an individual electronic system adapted for playing a Lotto game. The electronic system is configured to rapidly acknowledge a player's win or loss status. The player plays his/her selected numbers against the electronic lotto gaming apparatus randomly generated win numbers. In addition, the lotto gaming apparatus can transfer and receive lotto game information to a central processing system which is capable of handling multiple players from multiple lotto gaming apparatus either within a certain gaming facility or state wide, nationally or internationally. Moreover, the system is configured to allow individual players of the lotto game to access and rapidly determine their win status via an electronic telecommunications network such as the Internet.
